

APPENDIX

IMPLEMENTATION

INTRODUCTION

This Implementation Plan will guide City elected officials, commission and committee members, staff, and the public in the overall effort to put into practice the adopted General Plan goals and policies. The purpose of the implementation programs is to ensure that the overall direction set forth in the General Plan is translated from general ideas to actions.

Each implementation program is a procedure, program, or technique that requires City action, either alone or in collaboration with non-City organizations or with federal and state agencies. Some of the implementation programs are processes or procedures the City currently administers on a day-to-day basis (such as review of development projects). Other implementation programs require new programs or projects. Completion of each of the identified programs is subject to funding availability.

CITY DEPARTMENTS AND DIVISIONS IMPLEMENTING THE GENERAL PLAN

Implementing and maintaining the overall General Plan is the primary responsibility of the Planning Division of the Community Development Department. However, because General Plan policies affect nearly every aspect of City government and of City services provided in Orange, other departments also play key roles in ensuring that General Plan policies and programs are carried out to achieve the community's vision. Each of the City's departments has taken part in the preparation of the General Plan, and many have implementation responsibilities described in this section. In some cases, elements of the implementation programs may carry through to individual departments' work plans or the City's Capital Improvement Program. The implementation programs are also intended to be consistent with, and supportive of, the City's Strategic Plan.

The following section summarizes the Mission Statements of the departments most responsible for implementing the General Plan. These statements provide a broad overview of the types of programs each department is likely to be responsible for implementing.

City Council

The City of Orange is committed to excellent service for our residents, businesses, and visitors.

City Manager

To manage the City's resources with leadership and vision.

Community Development

To work with the community in achieving and maintaining a better quality of life by providing professional guidance and coordination of all land planning and development activities, and by fairly and consistently implementing the City's regulations and policies.

Community Services

To enhance the quality of life and a safe community by providing lifelong learning opportunities, leisure activities, and recreational experiences.

Economic Development

To promote economic growth and housing opportunities to enhance the quality of life throughout the community.

Fire

To prevent or minimize the loss of life and property from the adverse effects of fire, medical emergencies, and dangerous conditions created by man or nature.

Library Services

To welcome and support all people in their enjoyment of reading and pursuit of lifelong learning, to preserve local history, and to provide equal access to information, ideas, and knowledge through books, programs, and technology.

Police

To perform law enforcement duties with innovative leadership; accountable to the people we serve, in order to ensure their safety and improve the quality of life in our diverse community.

Public Works

To provide and preserve our City's infrastructure, facilities, and programs, and to promote public health, safety, and welfare through courteous and timely customer service and efficient use of available resources.

CITY OF ORANGE STRATEGIC PLAN

The *City of Orange Strategic Plan* establishes a vision for how the City as an organization delivers services to its residents, businesses, and visitors. The intent of the plan is to define the purpose of the organization, establish realistic goals and objectives, present a vision of success that will guide the ongoing direction of the organization, and help to ensure the most effective use of City resources by focusing the resources on key priorities. The 2008-2013 Strategic Plan establishes the following goals:

- (1) Provide for a safe community.
- (2) Be a fiscally healthy community.
- (3) Enhance and promote the quality of life in the community.
- (4) Provide outstanding customer service.
- (5) Recognize, promote, and preserve Orange's rich heritage.

These Strategic Plan goals are integrated throughout the General Plan policies, and are reflected in the Implementation Plan programs and specifications. Therefore, the Strategic Plan goals are also reflected in the individual department work plans and the City Budget.

IMPLEMENTATION PROGRAMS

General Plan implementation programs are organized into the following five subsections corresponding to various areas and levels of City responsibility:

- I. Plans, Permits, Procedures, Agreements, and Ordinances Administered by the City
- II. Physical Improvements and Capital Projects
- III. Conditions or Requirements Placed Upon Applicants during Development Review
- IV. Planning and Outreach Initiatives
- V. Coordination with Other Agencies and Organizations

Each implementation program relates directly to one or more of the General Plan policies, drawn from various elements. For each program, the related General Plan policies are listed, along with the responsible agencies or City departments, the recommended time frame, and the likely funding source.

The implementation programs are intended for use as the basis for preparing the *Annual Report to the City Council* on the status of the City's progress in implementing the General Plan, as described in Section 65400 of the Government Code. Because many of the individual actions and programs also act as mitigation for environmental impacts resulting from planned development in accordance with the General Plan, the Annual Report can also provide a means of monitoring application of the mitigation measures as required by Public Resources Code Section 21081.6. To ensure continued consistency and usefulness, the programs should be updated concurrent with the City's annual budget process and whenever the General Plan is amended or updated.

Implementation programs corresponding to the goals and policies set forth in the Housing Element are listed within the Housing Element, rather than within this Appendix.

I. Plans, Permits, Procedures, Agreements, and Ordinances Administered by the City

Program I-1 Zoning Code Update

Upon adoption of the General Plan, the City will initiate an update to the Zoning Code. The update will revise and/or establish new zoning standards to implement policies in the Land Use, Noise, Urban Design, and Cultural Resources Elements. This and all future updates to the Zoning Code will include an active public participation process.

The City is currently working on creating mixed-use zoning standards. Upon completion of these standards, the City will update Table LU-3 in the Land Use Element to identify corresponding land use designations for each mixed-use zone district. Specific Zoning Code revisions related to mixed-use land use designations will be covered in updated design standards, new streetscape standards, and the *Old Towne Design Standards* update. The zoning code revisions will designate buffer zones and transitional areas to minimize land use incompatibilities between single-family residential areas and intensified commercial operations and mixed-use development. The Zoning Code revisions do not specify changes regarding noise in mixed-use areas; however, Implementation Program I-31, "Noise Ordinance," seeks to minimize the effect of noise generated from industrial land uses on adjacent land uses.

Specific revisions to the Zoning Code will be completed to address:

- maximizing the amount of pervious surfaces in new and infill developments;
- integration of Crime Prevention Through Environmental Design (CPTED) principles into site plan and building design, including adequate safety lighting;
- integration of complementary uses in support of a safe community environment;
- a designation process for cultural resources to be listed on the City's local register, to include a broad range of historic resources including separate or individual buildings, structures, objects, and sites, as well as districts and archaeological resources;
- adaptive reuse of potential and listed historic resources—the City will consider provisions for including Neighborhood Character Areas (NCAs) as a zoning overlay, and the following planning areas may be considered for this zoning revision: El Modena, Cypress Street Barrio, and the Railroad/Packinghouse Corridor;
- development interface with Santiago Creek, the Santa Ana River, and other open space areas;
- incorporation of sustainable development principles, such as the adoption of resource conservation measures for building codes and standards, and specifications for multi-modal transportation;

- maintenance of the building security ordinance and addition of a CPTED element to those standards; and
- preparation of development standards that address National Pollutant Discharge Elimination System (NPDES) requirements.

Program I-3 Specific Plans

Prepare, adopt, and implement specific plans consistent with state law to establish permitted densities, intensities, and uses within Orange for the systematic implementation of the General Plan.

Continue to implement and update, as needed, the following adopted specific plans:

- Archstone Gateway
- Chapman University
- East Orange General Plan (1975)
- Immanuel Lutheran Church
- Orange Park Acres
- Pinnacle at Uptown Orange
- St. John’s Lutheran Church and School
- Santa Fe Depot Area
- Serrano Heights
- Upper Peters Canyon

New specific plans may be permitted elsewhere within the planning area in the future. Through the specific plan process, encourage developers to include or provide:

- context sensitivity and connectivity to surroundings,
- complementary mix of uses,
- pedestrian-oriented places,
- transit-oriented design,
- public spaces,
- green spaces, and
- CPTED design features.

Program I-5 **Transfer of Development Rights Ordinance**

Adopt a Transfer of Development Rights (TDR) ordinance to allow TDRs for the following purposes:

- to increase levels of residential densities at appropriate sites in areas designated Urban Mixed-Use, as described in Table LU-3 in the Land Use Element;
- to encourage well-designed high-rise development consisting of buildings 10 stories or higher at identified locations, as described in Table LU-4 and shown on Figure LU-8 in the Land Use Element;
- to expand and preserve open space in the Urban, Old Towne, and Neighborhood mixed-use land use designations, as described in Table LU-4 in the Land Use Element; and
- to provide incentives for preservation of listed historic resources or contributors to listed historic districts.

In each case, a Development Agreement between the property owner and City of Orange will be required.

Program I-6 Prepare Design Guidelines

Prepare new design criteria for public gathering spaces, commercial areas, rural development character, viewshed protection and preservation, and additional policies for mixed-use development and transit-oriented development as needed. New design criteria should also include landscape standards that provide open space buffers and other appropriate transitions between lower density, single-family neighborhoods and higher density development. Design criteria should also address standards for the provision of community gathering spaces within private development, incentives to provide accessible open spaces in commercial and mixed-use corridors, and guidelines for the preservation of visual points of interest throughout the community.

Program I-7 Redevelopment

Continue to implement and update the Redevelopment Agency’s Five-Year Implementation Plan in accordance with the requirements of the Health and Safety Code.

Use redevelopment resources to attract desired businesses and land uses to the designated focus areas consistent with the recommendations of the Land Use and Economic Development Elements. Pursue lot consolidation of irregular or small lots to assemble development sites to accommodate desired uses as needed.

Evaluate the potential for adding new areas to the Redevelopment Project Area, and update and/or amend the Redevelopment Plan(s) accordingly.

Program I-10 City Master Plan of Streets and Highways

Use the established Capital Improvement Program process to implement the circulation system shown on the City Master Plan of Streets and Highways (Figure CM-2), the City will secure funding for roadway improvements, will design and build new roadways, and will complete roadway repairs and improvements. Future roadways must meet roadway classification design specifications and performance criteria. To reduce the impacts of traffic on residential areas, encourage through traffic to use higher classification arterials as designated within the City's Master Plan of Streets and Highways.

Program I-11 Critical Intersection Program

To ensure that traffic flows meet the level of service (LOS) standards established in the Circulation Element, roadway capacity in areas with excess traffic will be improved by restricting on-street parking, improving signal timing, widening intersections, adding through and turn lanes, and using other transportation systems management measures. Monitor the performance of Critical Intersections identified on Figure CM-2 in the Circulation and Mobility Element on an ongoing basis. Ensure that Critical Intersections approaching LOS D are prioritized for improvement within the City’s Capital Improvement Plan.

Program I-13 Pedestrian-Oriented Streetscape Master Plan

Prepare, adopt, and implement a pedestrian-oriented streetscape master plan as part of the City’s decision to enhance the walkability of public spaces, with the goal of promoting multi-modal transportation options. This plan will include the City’s key commercial corridors, such as Tustin Street, Chapman Avenue, Main Street, and Katella Avenue. The master plan should integrate concepts discussed for these corridors throughout the General Plan related to pedestrian facilities, streetscapes, urban green zones, façade improvements, and signage, including:

- identifying pedestrian links that need improvement and strengthening;
- determining new pedestrian links to underserved areas;
- ensuring adequate sidewalk widths to accommodate lighting, street trees, benches, and trash cans;
- establishing design character, standards, and guidelines for proposed outdoor spaces, paseos, and pedestrian paths;
- incorporating more functional and appealing outdoor spaces, paseos, and pedestrian paths within retrofits of current streetscapes as well as within new development;
- integrating public open space (e.g., plazas, neighborhood parks, pocket parks) in commercial and mixed-use corridors;
- providing transit amenities such as bus stops, shelters, and lighting;
- helping to reduce conflicts between land uses;
- determining entry or gateway street design elements and standards;
- minimizing barriers to pedestrian and bicycle access; and
- incorporating CPTED concepts.

The Plan should include sidewalk, transit, open space, and landscape design and standards. The planning process will include an active public participation component.

Program I-16 Certified Local Government Status

Apply to the Office of Historic Preservation (OHP) for inclusion in the Certified Local Government (CLG) program. Successful application includes meeting several requirements:

- Enact appropriate historic preservation regulations through an adopted historic preservation ordinance.
- Establish an adequate and qualified historic preservation review commission.
- Maintain a system for the survey and inventory of historic properties.
- Provide for adequate public participation in the historic preservation program.
- Satisfactorily perform the responsibilities delegated to the Certified Local Government.

Related Policies:
Cultural Resources: 1.1, 1.2, 1.3, 2.2, 3.1, 3.3, 3.4

Program I-17 Local Historic Register

Create the City of Orange Register of Historic Resources (Historic Register), which will serve as the local register of historical resources under the California Environmental Quality Act (CEQA). Automatically include all resources previously designated, listed, or determined eligible for listing within the National Register of Historic Places or California Register.

- Establish a process for handling voluntary requests for listing in the Historic Register. Support coordination with property owners of potential historic resources identified on the Orange Inventory, so that such potential historic resources can more readily be listed in the Historic Register.
- Establish a process for listing in the Historic Register those buildings, structures, objects, sites, or districts that meet the criteria.
- Establish procedures to remove historic resources from the Historic Register.
- Establish procedures for listing archaeological resources in the Historic Register. Employ appropriate criteria for evaluating potential significance of such archaeological resources as historical resources or unique archaeological resources under CEQA. Encourage voluntary listing of eligible archaeological resources.

Program I-18 Eichler Homes Landmark Districts

Pursue historic landmark district designation for three Eichler Homes tracts. Notify property owners in three Eichler tracts—Fairhaven, Fairhills, and Fairmeadow—of the intent to list each of the three tracts separately as local historic districts. Follow established procedures for Historic Register listing of each.

Program I-19 Historic, Cultural, and Archaeological Resources Survey

Continue to maintain an accessible and periodically updated inventory of potential historic resources. All surveyed properties will be included in the City’s Inventory of Historic Resources (Orange Inventory), and the Orange Inventory will be a valuable planning tool to be used in evaluating possible impacts a proposed project might have on previously evaluated potential and identified historic resources. Surveys and survey updates may be conducted by City staff, historic preservation professionals, and/or representatives of local preservation organizations.

Properties that have attained 45 years of age and are located within a designated historic district or Neighborhood Character Area (NCA) shall be subject to survey prior to issuance of any permit for alteration or demolition.

Survey other areas where potential for historic resources may exist.

Identify smaller character areas that contain concentrations of potential or listed historic resources that reflect a unique sense of time and place.

Use the Orange Inventory to identify potential historic resources for purposes of CEQA, National Historic Preservation Act (NHPA), and National Environmental Protection Act (NEPA) review of proposed projects. Only if potential historic resources in the Orange Inventory are listed in or eligible for listing in the California Register for CEQA or the National Register for the NHPA and NEPA shall they have a presumption of significance pursuant to CEQA Section 21084.1 and be treated as historical resources under CEQA.

Potential historic resources identified in the Orange Inventory may be listed in the Historic Register if they meet criteria for listing in the California Register.

Program I-34 Noise Standards and Acoustical Studies

Review development proposals to ensure that the noise standards and compatibility criteria set forth in the Noise Element are met. Consult Noise Element guidelines and standards for noise compatible land uses to determine the suitability of proposed developments relative to existing and forecasted noise levels. Enforce the California Noise Insulation Standards to ensure an acceptable interior noise level of 45 A-weighted decibels (dBA) community noise equivalent level (CNEL) in habitable rooms. Amend the Noise Ordinance to implement the noise standards presented in the Noise Element.

Develop noise impact analysis guidelines that describe the City’s desired procedure and format for acoustical studies. Acoustical studies will be required for all discretionary projects where any of the following apply:

- The project includes a noise-sensitive land use that is located within the existing or future 65 dBA CNEL contour for transportation noise sources.
- The project will cause future traffic volumes to increase by 25 percent or more on any roadway that fronts residential, institutional, or open space land uses.
- The project will expose a noise-sensitive land use to a stationary noise source or vibration source exceeding the standards outlined in the Noise Element. Such stationary sources may include mechanical equipment operations, entertainment venues, industrial facilities, and property maintenance.
- The project includes a noise-sensitive land use in the vicinity of existing or proposed commercial and industrial areas.
- The project is a mixed-use development that includes a residential component. The focus of this type of acoustical study is to determine likely interior and exterior noise levels and to recommend appropriate design features to reduce noise.

IMPLEMENTATION

An acoustical analysis prepared in accordance with the Noise Element shall:

- be the financial responsibility of the applicant seeking City approval of a project;
- be prepared by a qualified person experienced in the fields of environmental noise assessment and architectural acoustics;
- include representative noise level measurements with sufficient sampling periods and locations to adequately describe local conditions and predominant noise sources;
- estimate existing and projected cumulative (20 years) noise in terms of CNEL or L_{eq} , and compare those noise levels to the adopted standards and policies of the Noise Element;
- recommend appropriate mitigation to achieve compliance with the adopted policies and standards of the Noise Element. Where the noise source in question consists of intermittent single events, the report must address the effects of maximum noise levels in sleeping rooms in terms of possible sleep disturbance;
- estimate noise exposure after the prescribed mitigation measures have been implemented; and
- describe a post-project assessment program that could be used to evaluate the effectiveness of the proposed mitigation measures.

Program I-35 **Climate Action Plan**

The City of Orange shall develop and adopt a Climate Action Plan (CAP). The CAP will have two primary objectives: (1) reduce total greenhouse gas (GHG) emissions in the City by at least 15 percent from current levels by 2020, and (2) create adaptation strategies to address the likely impacts of climate change on the City, such as increased risk of flooding, diminished water supplies, increased risks of wildfire, and risks to public health. The CAP will contain the following chapters:

Climate Change and Orange—The first chapter of the CAP will outline the City’s rationale and motivation for addressing climate change by developing and implementing the CAP. The chapter will provide a brief overview of the science behind climate change, will describe the potential impacts that climate change may create in Orange, and will outline state policy mandates to reduce GHG emissions.

Baseline GHG Emissions Inventory and Forecast— In this chapter, the City will calculate GHG emissions for the base year, forecast emissions in 2020 under a business-as-usual scenario, and

describe the GHG reductions necessary to achieve the City’s adopted target. The City will make best efforts to evaluate all reasonable sources of GHG emissions. The chapter will identify GHG emissions and target levels per sector. Sectors to be described in the inventory will include municipal operations, residential, commercial, industrial buildings, motor vehicles, and waste. This inventory and forecast shall provide a benchmark for planning and monitoring progress in government operations and the community. The GHG inventory shall be conducted using a methodology consistent with that used by other local governments and will be completed within 1 year after the effective date of adoption of the General Plan.

GHG Emissions Policies and Measures— This chapter will describe the policies and measures that are necessary to reduce GHG emissions in the City and achieve the reduction target. Policies and measures will be created with public input from all stakeholders. Each measure will be enforceable, include a timeline, describe financing mechanisms, and assign responsibility to relevant agencies and departments. In addition to direct GHG reduction measures, the chapter will incorporate public education efforts to raise awareness on the importance of minimizing GHG emissions and methods for reducing emissions from individual lifestyles. These policies and measures will be developed within two years after the effective date of adoption of the General Plan. The effectiveness of policies and measures will be evaluated annually and will be modified as necessary to achieve the City’s reduction goals.

Climate change mitigation measures identified in the General Plan EIR shall be applied to new development projects upon adoption of the General Plan, and shall be incorporated as GHG reduction measures within the Climate Action Plan.

Because the CAP is to be implemented over a period of several years, it is likely that the scientific, federal, and state policy frameworks surrounding climate change measures will evolve. The CAP will adapt its policies, measures, and programs to ensure successful reduction of GHG emissions, protection of the City, and compliance with regulations.

Protection and Adaptation Strategies—The fourth chapter of the CAP will describe strategies that will be used to protect the City from and facilitate adaptation to the potential effects of climate change. Potential effects to be evaluated include but are not limited to sea level rise, increased frequency and magnitude of flooding, diminished water supply, habitat loss, and possible effects on public health and the local economy. Each measure will include a timeline, describe financing mechanisms, and assign responsibility to relevant agencies and departments.

Benchmarks and Next Steps—In conclusion, the CAP will identify benchmarks, monitoring procedures, and other steps needed to ensure the City achieves its GHG reduction, protection, and adaptation goals. Monitoring and verifying progress on the GHG emissions reduction measures will be conducted on an annual basis. Monitoring will provide important feedback that can be used to demonstrate overall progress toward emissions reduction targets and improve measures over time. Benchmarks will be established to serve as intermediate goals and to motivate compliance with City and private-sector reduction targets. Benchmarks for strategic responses to climate change impacts should be based on the expected time scale of the specific impact and will be established during the development of individual strategic plans.

IMPLEMENTATION

CAP Relationship to the General Plan—Implementation strategies identified in the CAP will be incorporated as implementation measures of the General Plan through amendment within one year of completion. Revisions to CAP policies and measures and subordinate strategic programs may require further General Plan amendments.

II. Physical Improvements and Capital Projects

Program II-1 Capital Improvement Program

Continue to implement and update the City's *Capital Improvement Program* (CIP) to:

- address phasing, construction, and maintenance of improvements to roadways, infrastructure, streetscapes, signage, and City-owned parks throughout the City;
- acquire and expend funds from available transportation financing and other programs to assist in financing new roadways and trails;
- manage construction of new parks and improvements to current parklands and park facilities;
- facilitate construction of a network of multi-use trails that connects the City's parks and open spaces;
- improve and expand Orange Public Library facilities;
- ensure timely completion of required roadway infrastructure associated with new and infill development;
- maintain City-owned and operated facilities; and
- maintain publicly owned potential and listed historic resources.

Use the 7-year CIP process to prioritize, finance, and complete roadway, infrastructure, and parks projects identified in the CIP. Update the CIP on an annual basis to respond to changes in local priorities and available funding sources. Require future CIP update processes to include a public outreach component.

Agency/Department:	All departments

III. Conditions or Requirements Placed upon Applicants during Development Review

Program III-1 California Environmental Quality Act

Comply with all provisions of CEQA. In addition to thresholds that may be established or adopted by the City in the future, use the following thresholds and procedures for CEQA analysis of proposed projects, consistent with policies adopted within the General Plan:

- **Circulation**
 - Level of service (LOS) D (volume-to-capacity [V/C] ratio less than or equal to 0.90) shall be the lowest acceptable level of service for both roadway segments and peak-hour intersection movements.
 - Orange County's Congestion Management Plan (CMP) specifies LOS E (V/C ratio less than or equal to 1.00) as the operating standard for roadways on the CMP highway system.
 - Projects that increase V/C by .01 or more on affected roadway segments or intersections experiencing LOS E or LOS F conditions without the proposed project are considered to create significant impacts, and mitigation is required.
- **Parks and Recreation**
 - The City shall require dedication of parkland at a rate of 3.0 acres per 1,000 anticipated residents or payment of in-lieu fees for new residential projects.
- **Noise**
 - The City shall apply the noise standards specified in Tables N-3 and N-4 of the Noise Element to proposed projects analyzed under CEQA.
 - In addition to the foregoing, an increase in ambient noise levels is assumed to be a significant noise impact if a proposed project causes ambient noise levels to exceed the following:
 - Where the existing ambient noise level is less than 60 dBA, a project related permanent increase in ambient noise levels of 5 dBA CNEL or greater.
 - Where the existing ambient noise level is greater than 65 dBA, a project related permanent increase in ambient noise levels of 3 dBA CNEL or greater.
- **Historic and Cultural Resources**
 - "Historical resource" for the purposes of CEQA shall mean "historic district" in the case of a contributor to a historic district.
 - Historic resources listed in the Historic Register shall have a presumption of significance pursuant to CEQA Section 21084.1 and shall be treated as historical resources under CEQA.
 - The historical significance of an archaeological historic resource is evaluated using the criteria of Public Resources Code Section 5024.1 and Section 15064.5 et seq. of the state CEQA Guidelines.

Program III-3 Commission/Committee Review

Orange has several commissions and one committee whose purpose is to advise and assist the City Council in dealing with issues related to each commission's or committee's area of concern. The commissions and committee gather pertinent information, hear arguments, weigh values, and make recommendations to the Council. Several of the commissions also have some administrative powers.

The City will continue to use the commission/committee structure to inform the public decision-making process.

The City will also consider expanding the authority of the Design Review Committee and Community Development Department’s staff to administer the Orange Historic Resources Inventory, Historic Register listings, and design review procedures for projects involving architectural and archaeological resources.

The City will follow the most current NPDES permit and countywide *Drainage Area Management Plan* and the City *Local Implementation Plan* to ensure that the City complies with applicable federal and state regulations. Applicants for new development and redevelopment projects shall meet all of the following requirements:

- use structural and nonstructural best management practices (BMPs) to mitigate projected increases in pollutant loads and flows;
- control the velocity of pollutant loading flows during and after construction;
- limit areas of impervious surfaces and preserve natural areas;
- limit directly connected areas of impervious surfaces;
- use natural treatment systems such as wetlands and bioswales to treat storm runoff where technically and economically feasible;
- provide on-site infiltration and runoff and temporary on-site retention areas;
- limit disturbance of natural water bodies, natural drainage systems, and highly erodable areas; and
- use pollution prevention methods, source controls, and treatment with small collection strategies located at or as close as possible to the source.

In addition, applicants are required to meet site predevelopment hydrologic conditions and to control runoff on-site where technically feasible.

Program III-10 Cultural Resources Inventories

Require cultural resources inventories of all new development projects in areas identified with medium or high potential for archeological or cultural resources.

Where a preliminary site survey finds medium to high potential for substantial archaeological remains, the City shall require a mitigation plan to protect the resource before issuance of permits. Mitigation may include:

- ensuring that a qualified archaeologist is present during initial grading or trenching (monitoring),
- redesigning the project to avoid archaeological resources (this is considered the strongest tool for preserving archaeological resources),
- capping the site with a layer of fill, and/or
- excavating and removing the archaeological resources (recovery) and implementing curation in an appropriate facility under the direction of a qualified archaeologist (interpretation).

Alert applicants for permits within early settlement areas to the potential sensitivity. If significant archaeological resources are discovered during construction or grading activities, such activities shall cease in the immediate area of the find until a qualified archaeologist can determine the significance of the resource and recommend alternative mitigation.

Program III-11 Green Building, Energy Conservation, and Sustainable Development

The City strongly encourages new development and major renovation projects to employ green building techniques and materials. Evaluate proposed development projects throughout the City

using Leadership in Energy and Environmental Design (LEED) standards developed by the U.S. Green Building Council or an equivalent program. Encourage building orientations and landscaping that enhance natural lighting and sun exposure. Prepare guidelines for sustainable development to encourage incorporation of these practices in new development. These guidelines will include measures to maximize soil permeability to address related stormwater and surface-water runoff issues.

Require compliance with state Title 24 building construction standards and Energy Star conservation standards for all development projects.

Climate change mitigation measures identified in the General Plan EIR shall be incorporated as implementation programs and applied to new development projects upon adoption of the General Plan.

IV. Planning and Outreach Initiatives

Program IV-1 Annual Review of General Plan and Land Use Policy Map

Annually review implementation of the General Plan and Land Use Policy Map to identify the effect of land development and use on City revenues and costs of providing and maintaining public facilities and services.

Report annually to the City Council regarding progress toward established objectives.

Agency/Department:	Community Development Department
Funding Source:	General Fund
Time Frame:	Ongoing, with annual reports to City Council
Related Policies:	All

Program IV-2 Park Acquisition, Construction, and Maintenance Report

Work actively to acquire, build, and maintain approximately 241 acres of additional parkland to achieve a minimum parkland ratio of 3 acres per 1,000 persons by 2030, and work toward a desired ratio of 5 acres per 1,000 persons by 2050. Evaluate progress toward achieving this goal by preparing a status report for the City Council and community every five years.

As a separate but compatible objective, support efforts by the County of Orange or private landowners to provide an additional 303 acres of regional parkland to support an overall objective of 10 acres of parkland per 1,000 persons, inclusive of County regional parks.

Work with the private sector to encourage use of vacant commercial or industrial properties for recreational purposes.

Agency/Department:	Community Services Department
Funding Source:	General Fund
Time Frame:	Baseline status report completed by 2012 Ongoing 5-year reporting beginning in 2015
Related Policies:

Program IV-3 Public Education Programs

Use public education activities to accomplish the following objectives:

- Improve citizen participation in land use and economic development planning processes. Promote awareness of Orange’s historical and architectural resources and potential strategies for adaptive reuse of historic structures.
- Educate residents regarding air and water quality, including the effects of urban runoff.
- Raise public awareness of public safety issues—fire safety, flood hazards, homeland security, and other programs.
- Raise public awareness about the importance of green building techniques.
- Educate the public regarding the benefits of recycling and waste reduction.
- Promote traffic safety awareness programs.
- Promote the application of CPTED to new development projects.
- Support neighborhood meetings and community programs on crime prevention and education.
- Continue to support existing Neighborhood Watch programs, and support the efforts of the City of Orange Police Department to expand these programs.

Coordinate education activities and make materials available to residents. Utilize all available media—forums, flyers, brochures, e-mail, videos, interpretive displays, workshops, and the City’s website and cable television channel—to accomplish these objectives. Fully utilize the resources of the Orange Public Library to disseminate this information. Explore partnerships with local schools and educators to develop various educational programs related to historic preservation, personal and community safety, and environmental awareness.

Program IV-4 Santiago Creek and Santa Ana River Vision Plans

Continue efforts to prepare and adopt a vision plan for Santiago Creek addressing recreational trails, open space, and flood control.

Support future development of highly visible access points to the Santa Ana River, particularly at Lincoln Avenue, Katella Avenue, and Chapman Avenue. Partner with the City of Anaheim, resource agencies, and community organizations to complete a vision plan for the Santa Ana River, similar to the plan for Santiago Creek.

Agency/Department:	Community Development Department, Community Services Department, Public Works Department
Funding Source:	Grants, General Fund
Time Frame:	Santiago Creek Plan completed by 2009 Santa Ana River plan completed by 2020

Program IV-5 Solid Waste Source Reduction and Recycling

Continue to implement waste diversion programs as well as public education programs as outlined in the City’s Source Reduction and Recycling Element required by Assembly Bill 939

IMPLEMENTATION

(1989). Work to expand recycling pickup to all residential addresses in the City. Conduct a waste characterization study to identify the major constituents in the City's solid waste stream. The results of the study will be used to guide development of the recycling and outreach program, and possible revisions to waste handler contracts. The City will also consider anticipated waste associated with the land use types of future development.

Program IV-7 Growth Management Performance Monitoring Program

As required by Measure M, the City's annual Performance Monitoring Program is intended to provide an annual evaluation of its development phasing plans. This program reviews and evaluates the implementation of phasing plans that reflect conditions of approval for traffic improvements required as mitigation measures for development projects. The monitoring program is intended to ensure that road improvements or funding are actually provided as required, to determine whether development may continue. If the improvements or funding specified in project conditions have not been provided, the City shall defer development until compliance with the provision of this program is achieved.

The monitoring program includes an annual review of new development projects until all required improvements have been constructed. Traffic-related mitigation requirements, such as TDM programs, will be continued in conformance with the provisions of the project-approved programs.

Program V-2 Orange Unified School District and Santiago Canyon Community College District

Coordinate with the Orange Unified School District and Santiago Canyon Community College District to address the following issues, as applicable:

- preparation of facilities master plans;
- continued development of safe pedestrian and bicycle routes to all schools and ensuring that physical improvements (such as crosswalks and bike racks) are in place to support walking and bicycling to schools;

IMPLEMENTATION

- exploration of nonstructural solutions that may encourage people to walk or bus to school, rather than drive (e.g., staggered start times, walking groups);
- continued joint use of school sites for community recreation;
- exploration of joint use of school site(s) for public library service;
- continued youth and family services to serve families of children living within the school district's boundaries;
- continued joint-use agreements to make additional recreational facilities available to the community during non-school hours;
- requiring new or remodeling existing schools to install appropriate student pick-up/drop-off areas; and
- preparation of an elementary school curriculum, including suggested supplemental activities, for teaching children about cultural and historical resources, personal and community safety, sustainable lifestyles, and environmental awareness in the City.

Program V-3 Adjacent Jurisdictions and Special-Purpose Agencies and Organizations

Continue to coordinate with adjacent jurisdictions and special-purpose agencies and organizations for the following purposes:

- land use planning efforts;
- growth and facility planning, management, and maintenance;
- planning and developing major east/west and north/south arterials and rapid transit;
- ensuring that Orange benefits from the planned Anaheim Regional Transportation Intermodal Center (ARTIC);
- connecting City trails to trails in adjacent jurisdictions and regional trails networks, including Santiago Creek, the Santa Ana River, and the proposed Tustin Branch Trail;
- completing vision plans for Santiago Creek and the Santa Ana River;
- maintaining an appropriate level of transportation impact fees and other public service fees;
- continuing and adopting mutual-aid agreements;
- maintaining flood control facilities and implementing a capacity analysis;

- developing trails along service roads for flood control channels;
- aircraft corridor planning, minimizing aircraft overflights in the City, and coordinating approval of heliport/helistop operations;
- disaster preparedness and emergency response for earthquakes and wildland fires; and
- participating in interjurisdictional planning forums through the established Growth Management Areas (GMAs) adopted by the Regional Advisory Planning Council as well as the City’s Joint Powers Agreements with adjacent cities to address cumulative traffic impacts and to coordinate improvements in transportation facilities.

Program V-5 Orange County Transportation Authority

Work closely with the OCTA to achieve the following objectives:

- Maintain consistency with the County Master Plan of Arterial Highways, including the reclassification of roadways described in the Circulation and Mobility Element, such as portions of Cambridge Street, Walnut Avenue, and La Veta Avenue, and Glassell Street and Chapman Avenue through the Plaza.
- Implement provisions of Measure M.
- Implement the OCTA Congestion Management Plan (CMP).
- Expand and improve the efficiency of bus service within the City.
- Encourage the expansion of alternative local transportation options such as a community circulator bus service between transit centers and major commercial, employment, and residential areas.
- Improve paratransit or other public transportation systems that enhance the mobility of Orange’s senior and youth populations, and the disabled.
- Encourage provision of attractive and appropriate transit amenities.
- Support and implement the OCTA Commuter Bikeways Strategic Plan and participate in future updates and revisions to the Plan.
- Reduce noise impacts of OCTA operations and facilities.

Work closely and coordinate with the California Department of Transportation (Caltrans) and the Transportation Corridor Agency (TCA) on all plans, activities, and projects that may affect state roadway facilities or transportation corridors passing through Orange. Additionally, work with these agencies to achieve the following objectives:

- Provide appropriate screening to control the visual impacts of transportation facilities.
- Provide landscaping within transportation facilities.

- Study the potential for a future interchange at State Route 55 and Meats Avenue.
- Determine the feasibility of conversion or joint use of surplus or otherwise underutilized lands under Caltrans or TCA control for open space.
- Plan for noise abatement along freeways and highways.
- Install, maintain, and update freeway and highway right-of-way buffers and soundwalls.
- Provide adequate visual buffers such as berms or landscaping between freeways and railways and adjacent land uses.

- California Historical Landmarks
- California Points of Historical Interest
- California Register of Historical Resources
- National Register of Historic Places
- Secretary of the Interior's Standards
- CEQA

The Mills Act is another preservation tool created by the California Legislature, enabling cities to enter into historical property agreements with owners of qualifying properties that result in reductions to the owners' property taxes. The agreements provide a benefit that ensures preservation and guarantees authentic rehabilitations and a high level of maintenance of historic resources. The City will continue to offer the Mills Act program to private property owners and publicize its availability.
